

The Pool Pillow PalTM

Makes closing your pool *easy!*

The Pool Pillow Pal is a device that connects and centers the air pillow to the winter cover without ropes or ties, taking the frustration out of using air pillows. It makes the customers job easier while bringing the dealer additional revenue because it does not replace any items, it simply connects two items currently being sold; air pillows and winter covers! Your customers will not go back to tying the pillow in, which means recurring revenue for your business.
